

CBOND TRAFFIC PANELS

CBond Traffic panels are the proven, sustainable choice for permanent road and motorway signs. Pioneered by Cgate in 2006, our traffic-grade ACP was the first of its kind to pass all safety and assembly approval tests required by motorway authorities, and is now trusted across multiple European countries.

Our panels fully comply with EN 12899 and have successfully passed additional mechanical and ageing tests, confirming long-term performance in the most demanding outdoor environments.

Compared to solid aluminium, ACP actively deters theft by containing significantly less pure metal, reducing costly sign replacements. Fabrication is fast and straightforward using standard routing tools, and no specialist equipment is needed. The carbon footprint is a fraction of an equivalent solid aluminium sheet, supporting sustainability targets without any compromise on performance.

With over 20 years of proven supply experience and a strong presence across the UK and Europe, Cgate is the trusted name in traffic signage.

APPLICATIONS

- Traffic Road Signs
- Highway & Motorway Signs
- Directional Signs
- Parking and Caravan Sites Signs
- Historical Monuments Signs
- Airports and Helipads Signs

| Permanent Traffic | | | |
|-------------------|----------------|---------------------|---|
| Product ID | Thickness (mm) | Skin Thickness (mm) | Sizes (m) |
| TALS03-30 | 3 | 0.3 | 1.22x2.44 / 1.50x3.05 / 1.525x3.05 Single or both sides colour (Black, Grey & Green) |

| Temporary Traffic | | | |
|-------------------|----------------|---------------------|---|
| Product ID | Thickness (mm) | Skin Thickness (mm) | Size (m) |
| ALS03-20 | 3 | 0.2 | 1.22x2.44 / 1.50x3.05 / 1.525x3.05 Single or both sides colour (Black, Grey & Green) |
